PROFILE

Final-year engineering student at IMT Nord Europe, dual degree with the National University of Colombia. Backend and fullstack development, systems and networking, robotics. **Seeking a six-month final-year internship, available from 12 February 2027.**

PROFESSIONAL EXPERIENCE

Assistant engineer — 5G platform

IMT Nord Europe — CERI Systèmes Numériques

📅 May 2026 – August 2026

📍 Villeneuve-d'Ascq, France

- End-to-end deployment of a private 5G Standalone network: containerised OpenAirInterface core, base station and software-defined radio
- Diagnosed a 20–65 % loss of radio samples in a virtual machine by measurement, cause isolated to hypervisor real-time behaviour; **zero loss on bare metal**

Backend developer

IHUBBS Business Solutions

📅 February 2025 – June 2025

📍 Australia / Remote

- School tracking platform replacing a manual Excel sheet: grades, attendance and teachers for **3 schools and 1,000 students**; built from scratch, sole backend developer
- Data model I designed myself, **redesigned twice** at the client's request; Node.js, Express, MySQL, JWT and bcrypt

Software developer

Nesco Inversiones — real estate agency

📅 February 2024 – December 2024

📍 Bogota, Colombia

- **Sole developer**, from mockup to production: React.js website, Django contact form, then an internal task-management app used by about 15 employees

EDUCATION

Secure and Intelligent Communicating Systems (SISC)

IMT Nord Europe — Lille

Sept. 2025 – 2027 (ongoing) — dual degree

Systems and Computer Engineering

National University of Colombia — Bogota

January 2021 – 2027 (ongoing)

Best Grade Average Programme distinction (PMP)

PROJECTS

X.509 certificate analysis

Python, Tkinter, network sockets, multithreading

Certificate analysis and validation, locally or remotely. Multi-client server, trust chain verification.

🔗 x509-certificate-analysis

Company Ranker

React.js, Express.js, MySQL, microservices, AWS, Azure

Company and product evaluation, in a Scrum team. Express REST API, then microservices deployed on AWS and Azure.

Autonomous GPS waypoint navigation

ROS 2 Jazzy, Gazebo, Python

ROS 2 nodes piloting a WAM-V surface vessel: GPS → ENU conversion and heading controller over the thrusters.

🔗 vrx_ws-Path-planner

SKILLS

Languages

C C++ Python JavaScript TypeScript
SQL Bash

Backend and API

Node.js Express Django REST API JWT
microservices

Front-end

React.js Angular Vite Tailwind CSS

Databases and systems

MySQL PostgreSQL MongoDB Linux
Docker AWS Azure

Data, robotics and methods

ROS 2 Gazebo OpenCV scikit-learn Git
Scrum Jira
